A SPA GEM IN ENGADIN

The Mineralbad & Spa Samedan is situated in the historic heart of Samedan village, adjoining the listed church on the main square.

It is Switzerland's first vertical mineral spa, and as well as the unique vertical design, it is the architecture by Miller & Maranta that truly stands out: every spa room is clad in glazed mosaic tiles, from the pools to the walls and ceilings. Various different openings offer views into, out of and through the space, which combine with natural illumination and atmospheric lighting to create a mystical ambience. Guests bathe in water from the spa's own spring, which is thought to have healing properties due to its specific mineral make-up.

YOUR SPA RITUAL IN SAMEDAN

Wander through a world of baths and steam rooms that resembles a mountain labyrinth. Your spa ritual begins in the mountain spa. The labyrinthine rooms and alcoves invite you to explore. The cleansing ritual begins on the floor above, in the 40°C herbal steam bath, where the fragrant herbal steam opens your pores. This is followed by exfoliation using the exfoliating mitt and a visit to the hot steam room, which purifies and detoxes your body. As your body floats weightlessly through the water, so will your mind and soul... The hot tub aids the process by massaging and relaxing your whole body. The warmth of the water stimulates your circulation, boosts your metabolism and

helps you sleep well. The heated relaxation room is the perfect place to unwind. The rooftop pool, with its views of the stunning Grison Alps, is the crowning glory of your spa ritual.
